

CARD PLUS KIOSK

SELF SERVICE INSTANT ISSUANCE SOLUTION

When it comes to Enterprises, Cooperations, Government Institutions and Airports looking to deliver their card solution to their employees and Visitors. Making this accessible, user friendly and remotely monitored are some of the pain points they are looking to address for their customers and suppliers.

CardPlus introduced their Kiosk solution that offers an entirely bespoke solution and experience for System Integrators, large entities and Airports looking for a robust and interoperable Kiosk.

Does your organisation have difficulties delivering cards to cardholders?

With this Kiosk, CardPlus may have the right solution for you. A combination of world-leading technologies provides you with the exact components needed to capture data and issue the card using the latest world leading Retransfer Printer, Laser Engraving, RFID encoding and biometric personalisation in a single pass.

SECURITY & INTEGRATION

CardPlus offer a full range of professional services to build, implement and manage our customized enterprise level security and identity solutions.

VERSATILITY

The Kiosk offers a true customisable experience for the customer. We can offer a wide range of features and hardware to meet your card program needs.

IMAGE QUALITY

High Resolution printing up to 600 DPI (depending on type of printer) provide superior over the edge print quality for all your financial card programs.

RELIABILITY

CardPlus are well respected globally for their German engineering for quality and reliability.

INNOVATION

Innovating since the 90s with state of the art printers, providing safe, secure, and reliable ID card solutions to domestic and global organisations since 2011.

DURABILITY

Highly durable printers with industry leading warranties on all our products and lifetime on the print head (Retransfer only).
